Revolution Stone is your vision, uncompromised. Our state-of-the-art facility is where we bring in raw quarry stone and transform it to your exact specifications. Whether matching historic structural or decorative stonework, or bringing to life the most intricately drafted design element for your new construction, Revolution Stone has the technology to realize this vision.

The Square & Rec pattern gives a structured look to a project. These stones are manufactured and shipped in a roughly square and rectangular shape. This gives the mason the ability to create straight edges for a clean look that can be repeated in a random pattern.
SQUARE & REC

- Franklin Collection
- Jefferson Collection
- Hamilton Collection

Thickness: 1\" ± to 1\(\frac{1}{4}\)\" ±
Facing Area: ½ sq. ft. to 3 sq. ft.
Coverage per Pallet (Avg): 100 sq. ft. per pallet
Packed Weight: 1,300 lb
Approx. lbs per sq. ft.: 11-13 lbs
Our Ashlar pattern thin stone shows a more linear look of the installed pattern. The stone is cut showing the inside grain of the stone conveying a more variegated color and texture contrast. The overall ashlar shape allows for straight clean linear lines displaying a more contemporary look.

Thickness: 1” ± to 1 1/4” ±
Length: 6” ± to 24” ±
Height: 3” ± to 12” ±
Coverage per Pallet (Avg): 100 sq. ft. per pallet
Packed Weight: 1,300 lb
Approx. lbs per sq. ft.: 11-13 lbs
When considering a mosaic pattern, it’s important to understand that the pieces of stone you receive will range in size and shape. Since no two stones will be the same, your project will have a unique pattern nearly impossible to duplicate.

- **Thickness**: 1" ± to 1 1/4" ±
- **Facing Area**: 1/2 sq. ft. to 3 sq. ft.
- **Coverage per Pallet (Avg)**: 100 sq. ft. per pallet
- **Packed Weight**: 1,300 lb
- **Approx. lbs per sq. ft.**: 11-13 lbs
The Ledge shape is often used for a rough, rugged look. Its short profile that is installed in a linear fashion is more of a broken pattern unlocking a unique characteristic of color and texture. It is a great stone to use in smaller areas where space is a concern, such as back splashes in kitchens, small columns, fireplaces and outdoor sitting walls.

Our state of the art stone fabrication facility is where we bring raw quarry stone in and transform it to your exact specification. Whether matching historic structural or decorative stonework, or bringing to life the most intricately drafted design element for your new construction — Revolution Stone has the technology to bring your work to life.

The Facility is equipped with multiple CNC work centers run by CAD/CAM software. This allows us to import your exact measurements from a drawing of what will be made out of stone. Our CNC Machines include straight line profiling saws, a 3 Axis fabrication center, and a 5 Axis CNC saw.

If you have the idea, we can produce it here—from intricate profiles on sills and water tables, to custom exterior countertops, hearths and mantles, to lintels, column caps and coping, our fabrication division is comprised of some of the best skilled stone finishers in the business, keeping watch over every detail.

Visit Revolutionstone.com for more information about our products and capabilities.
Our Architectural division is our proudest department here at Revolution Stone, introducing both durability and versatility on some of our cities’ most prized new and historical buildings. From start to finish, we execute complete transformations of raw material into some of the elegant stone carved structures we see today. Our technology allows us to fine tune the smallest details in stone carvings when undergoing any restoration work in our nations’ historical settings. We strive to be the East Coast’s industry leader by providing top quality finished products in limestone, sandstone and granites from around the United States and Canada.
